## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the casing cutters, the steering joint and tubing having an electrical conductor embedded therein must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Arutunoff, U.S. 2,609,182.

Arutunoff discloses a remotely controlled drilling assembly (col. 2, lines 15-25) suspended on a cable (157, 33) surrounding a wire (138, 48).

Arutunoff discloses expansion means (105) or reamer blades and other expansion means (61) or chamber for increased oil volume (col. 4, lines 13-24).

Arutunoff discloses an electric motor (52) for rotating drill bit and an electrical motor (122) for rotating the drill bit and reamer (col. 8, lines 20-24; lines 49-52) or hole opener.

Arutunoff discloses axially moveable (col. 5, lines 64-67) cable traction means (94,95,97,98,100,101) or antirotation collar axially moveable along the wire portion of the cable and inherently capable of supporting an expandable liner pipe thereon.

***Allowable Subject Matter***

Claims 11-14 are allowed.

Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Simmons, U.S. 1,880,218 discloses a percussive drill (B), liner (D), expander (C), deepening the well (p. 3, lines 1-8), a locking head (F) or traction means, expanding the lower end (p. 3, lines 83-102) of the casing and a similar cable (G).

Grable, U.S. 3,216,512 disclose a similar suspended drill for casing installation.

Muench, U.S. 3,280,923 discloses a similar suspended steerable drill.

Wardley et al. U.S. 6,412 disclose similar wireline drill.
